Role Description:

We are seeking a talented and experienced Software Engineer to join our team (*Preferably Immediate Joiner to 1 Month*) at Undri Location. This is a full-time, on-site role based in Undri Pune. As a Software Engineer, you will be responsible for developing and maintaining front-end & back-end web applications in Dot Net Core Framework using C-Sharp (C#) Language, & Database being MSSQL. Your day-to-day tasks will include software development, programming, and implementing object-oriented programming principles. You will work closely with the development team to ensure high-quality code and efficient application performance.

Key Responsibilities:

- Develop and maintain back-end web applications using Dot Net, C-sharp.
- Implement and follow object-oriented programming principles.
- Collaborate with the development team to produce high-quality code.
- Ensure efficient application performance and address any issues promptly.
- Stay updated with the latest industry trends and technologies.
- Work on software development projects from concept to completion.

To qualify for this role, you must have:

- **Bachelor's degree** in computer science, engineering, or a related field. MBA or advanced technical degree preferred Dot Net/C# & MSSQL.
- Minimum of 1–2 years of hands-on experience in Dot Net development using C#.
- Proficiency in back-end web development.
- Strong programming skills and familiarity with OOP concepts.
- Experience with MSSQL is mandatory. Should be able to write Optimized Stored Procedure.
